Experience

Software Developer – Voya Financial, New York

[June 2023 – Present]

- Developed **15+ REST APIs** using **Java/SpringBoot**, enhancing integration efficiency, while optimizing chatbot workflows with **Genesys Architect** and **Google DialogFlow**.
- Resolved **3 critical JavaScript defects**, enabling business to secure new clients, earning an **Outstanding Contributions Award** for impactful problem-solving.
- Executed **end-to-end production deployments** with tools like **GitHub, Jenkins, OpenShift, and XLD**, ensuring zero downtime and rapid issue resolution during maintenance windows, enhancing CSAT and resolve rates.
- **Promoted to a new cross-functional team** to foster synergy between Genesys and Salesforce, balancing dual-team responsibilities and consistently meeting sprint deadlines.
- **Mentored interns and new hires** through knowledge transfer sessions and comprehensive documentation, ensuring smooth onboarding and alignment with team standards.

Software Assistant – New York Institute of Technology, New York

[September 2022 – May 2023]

- Developed prototypes for **NASA: Python-based Data Analysis** tool that works with multiple kinds of time series data.

Software Developer Intern – Voya Financial, New York

[June 2022 – August 2022]

- Accelerated the cloud migration process with **REST API** development in **Java** and **SpringBoot**, and **API** testing in **SoapUI**.

Education

MS in Computer Science – New York Institute of Technology, New York

GPA: 3.8/4.0

[September 2021 – May 2023]

- **Double Runner Up** – ETIC **Data Science Hackathon** 2021 and 2022.

Bachelor in Electronics Engineering - University of Mumbai, Mumbai

GPA: 3.6/4.0

[June 2017 – May 2021]

Projects

React Portfolio [*React, Node.js, Redux, APIs, Google DialogFlow*]

- **Designed** a responsive React portfolio using Material UI, showcasing projects, work experience, and skills interactively.
- **Established** a backend system with Node.js to deliver 100+ real-time messages from the UI directly to the inbox.
- **Integrated** an intelligent chatbot using Google DialogFlow, with 30+ intents to help users with FAQs and page navigation.
- **Leveraged Redux** for efficient state management, ensuring consistent user experience across dynamic UI components.

EZInterview [*React, Node.js, Express.js, MongoDB, Twilio, APIs, AWS*]

- **Engineered** a real-time video platform with React, utilizing **Twilio** for video call scheduling, and JWT for secure authentication.
- **Developed 8+ REST APIs** with **Node.js** building efficient data retrieval systems with user data stored in **MongoDB** backend.
- Powered dynamic interview scheduling and **data management** through **CRUD operations** and **RESTful API** integrations.
- Designed full-stack solution, integrating **15+ API calls** between **frontend** and **backend** apps to deliver a **robust user experience**.
- **Deployed** final product on AWS, scaling with 2 EC2 instances, 1 RDS database for user data, and S3 for storing media files.

FinanceAI [*React, Node.js, Python, MongoDB, ML, LSTM, Redis*]

- Built a scalable expense tracker with React, Node.js, Python, MongoDB, and Kafka, handling 1M+ transactions in real time.
- Developed LSTM / Isolation Forest models achieving 85% accuracy in expense forecasting and 99% precision in fraud detection.
- Implemented smart categorization using NLP, automating transaction tagging with 92% accuracy, reducing manual input by 70%.
- Designed analytics dashboards with Recharts, dynamic visualizations of spending trends, and ML-driven budget suggestions.
- **Enhanced performance** with **Redis caching** (40% faster response) and offline PWA support for a seamless user experience.

Benefits API Integration [*Java, APIs, SpringBoot, Genesys, Git, CI/CD*]

- Developed **8 REST APIs** in Java, integrating data from **4 backend services** to streamline the data retrieval.
- Designed **5+ intelligent chatbot workflows** in Genesys Cloud, using advanced business logic for efficient query resolution.
- Leveraged **GitHub** and **Jenkins** for CI, **OpenShift** for deployment, and **XLD** for automated CI/CD across **4 dev environments**.
- Deployed project to production with **0 downtime**, ensuring **100% issue resolution** during the maintenance window.
- Achieved a **12% growth** in customer satisfaction on **Voya PAL**, with scalable systems and enhanced user experience.

Skills

Languages – Python, JavaScript, Java, SQL, C, C++, HTML, CSS

Software Tools & Frameworks – Visual Studio, Jupyter Labs, Android Studio, Git, GitHub, React.js, Node.js, Django, REST, SpringBoot, OpenShift, Jenkins, XLD, SoapUI/Postman, StreamLit, Microsoft Office, Tableau

Database & Cloud Technologies – MongoDB, Google Firebase, Google DialogFlow, MySQL, AWS, Genesys Cloud, Salesforce.

Professional Skills – Agile, Scrum, leadership, team management, critical thinking, innovation.
